EXPERIENCE

Mediacreche Solutions Pvt. Ltd.
IoT & Embedded Software Intern

May 2026 – Present
Bangalore, India

- **Engineered firmware and backend data pipelines** using C/C++ and Python for ESP32 and Raspberry Pi hardware platforms.
- **Designed low-latency telemetry protocols** leveraging MQTT, Wi-Fi, and Zigbee to process real-time sensor data streams every 3 seconds with high reliability.
- **Optimized system communication protocols** and hardware-software integration, conducting rigorous unit testing and debugging to minimize latency and packet drops.

Tamil Nadu Smart & Advanced Manufacturing Centre (TANSAM)
PLC & Industrial IoT Intern

Jul 2025 – Aug 2025
Chennai, India

- **Developed automated control logic** on Siemens S7-1200 PLCs (TIA Portal, Ladder Logic) for real-time automated bag scanning systems.
- **Built Node-RED data workflows** to connect edge hardware devices directly to IIoT cloud services for remote monitoring and data processing.

Bharat Sanchar Nigam Limited (BSNL)
Telecom Engineering Intern

Feb 2025
Nagercoil, India

- **Analyzed telecom networking infrastructure**, routing protocols, and distributed communication models to understand large-scale system architecture.

PROJECTS

ML-Based Fruit Ripeness & Spoilage Predictor

Jan 2026 – Apr 2026

- **Built a Computer Vision pipeline** using TensorFlow, MobileNet, and OpenCV to classify fruit quality, achieving **92% accuracy** across Mango, Apple, Banana, and Tomato.
- **Integrated Firebase NoSQL Cloud Backend** for real-time telemetry acquisition logging every 60s and automated threshold-based spoilage prediction.

Smart Bin for Automated Waste Segregation

May 2025

- **Developed real-time classification firmware** utilizing multi-sensor data fusion (Ultrasonic, IR, Moisture) on ATmega328P with **95% classification accuracy**.

EDUCATION

Anna University Regional Campus

*Bachelor of Engineering (Honours) in Electronics
and Communication Engineering*

Nov 2022 – May 2026

CGPA: 8.34 / 10

Relevant Coursework: Embedded Systems, IoT, Artificial Intelligence & Machine Learning,
Networks & Security, Digital Electronics, VLSI Design, Wireless Sensor Network

SKILLS

Languages: Python, C, Embedded C/C++, HTML/CSS

Frameworks & Tools: TensorFlow, OpenCV, MobileNet, Node-RED, Firebase Console, Git/GitHub, VS
Code, MATLAB, TIA Portal, Arduino IDE

Protocols & Systems: MQTT, Zigbee, Wi-Fi, BLE, Embedded Linux
